

SCR331

Contact Smart Card Reader

Features

- Modular form factor allows easy and flexible card-insertion angle
- Available upon request as ready-to-build in PCB (without casing)
- EMV Level 1 certified
- Compliant with all major smart cards and relevant industry standards
- Customization options: Casing color and company logo OEM branding
- Software and functionality compatible with SCM's SCR33xx readers family

Typical Applications

The SCR331 is suitable for a wide range of applications.

Typical applications for offices, IT companies and OEMs are for example logical access control to a PC or network, secure authentication for Business-to-Business and Business-to-Consumer applications, secure logon via email encryption.

With its EMV certification, the SCR331 is also suitable for banking related applications. The reader is ideal for integrating it into systems of the gaming industry. Its square modular shape makes it furthermore suitable for integration into external systems such as in transportation related systems, e.g. for parking, ticketing, and toll-collection.

The SCR331 can also be integrated into larger OEM systems, both with or without casing as a PCB module.

The SCM Microsystems' Advantage

Trusted Partner

- ASIC (application specific IC) and smart card reader development experience since 1990
- Innovative solutions - more than 50 patents filed
- Reliable high-quality mass production capability - more than 15 Mio. reader solutions deployed to date
- Active role in standardization committees
- Complex project management expertise e.g. U.S. Department of Defense CAC program, electronic ID applications (ePassport, health card projects, national ID, driver licence)

Support

- Global presence and support
- Product customization options
- Product branding
- Dedicated Research & Development and customer support team
- Strong global partnership network with leading suppliers along the value chain (smart card manufacturers, application providers, system integrators, device manufacturers)

Trusted Products

- Broadest portfolio of security technology products - for governments, corporations, financial institutions, small and medium-sized enterprises and individuals around the globe
- Secure smart chip reader design - certified and compliant to EMV, Common Criteria, PC/SC, USB
- High-quality products designed to meet the various requirements in the data security area
- Flexible and future proof solutions - SCM's SmartOS™ middleware and its own ASIC technology allow in Field upgrades and secure your investment
